BEFORE THE

FEDERAL COMMUNICATIONS COMMISSION

WASHINGTON, D.C. 20554

In the Matter of	
Indiana Statewide 911 Board NG911 Phase 1 Valid Request	PS Docket No. 25-143
Amendment Clarifying PSAP ESInet Designations and Phase 1 Traffic Delivery	Original Request Filed: May 6, 2025

AMENDMENT TO NG911 PHASE 1 VALID REQUEST

The Indiana Statewide 911 Board ("Board"), acting as the 911 Authority, submits this amendment to supplement and clarify its NG911 Phase 1 Valid Request, originally submitted on May 6, 2025. Its limited purpose is to clarify the ESInet serving each PSAP identified in Attachment A and the corresponding routing and delivery of NG911 Phase 1 traffic. Except as expressly stated herein, the Board's original Phase 1 Valid Request remains unchanged.

Amended Routing and Delivery Language

For purposes of the Board's NG911 Phase 1 Valid Request, 911 traffic destined for a PSAP identified in Attachment A shall be delivered to the applicable NG911 Delivery Point associated with the ESInet serving that PSAP. Attachment A identifies the applicable ESInet provider for each listed PSAP. PSAPs designated as being served by the AT&T ESInet shall receive Phase 1 traffic through the applicable AT&T ESInet delivery arrangement, and PSAPs designated as being served by the INdigital ESInet shall receive Phase 1 traffic through the applicable INdigital ESInet delivery arrangement.

Purpose and Scope

This amendment is intended solely to clarify the ESInet serving each PSAP identified in Attachment A and the corresponding routing of NG911 Phase 1 traffic. It supersedes any language in the original Phase 1 Valid Request that could be interpreted as directing all Indiana 911 traffic through a single ESInet provider.

For avoidance of doubt, this amendment does not designate either ESInet provider as an aggregator for statewide NG911 traffic, nor does it direct originating service providers to deliver all Indiana 911 traffic through a single provider. Originating service providers should deliver Phase 1 traffic to the applicable NG911 Delivery Point based upon the PSAP receiving the traffic and the ESInet serving that PSAP, consistent with Attachment A and the NG911 Delivery Point information provided by the Board.

Except as expressly clarified by this amendment, all certifications, representations, NG911 Delivery Point information, and other terms contained in the Board's original Phase 1 Valid Request remain unchanged.

This amendment shall be read together with the Board's original Phase 1 Valid Request and is subject to the applicable requirements and compliance timeframes of the Commission's NG911 rules.

Certification

I certify that I am authorized to submit this amendment on behalf of the Indiana Statewide 911 Board and that, to the best of my knowledge, the information provided in this amendment is true and correct.

Respectfully submitted,

Jeff Schemmer, ENP
Executive Director, Indiana Statewide 911 Board

ATTACHMENT A

PSAP ESInet Designations by County

The PSAP assignments below govern the ESInet clarification stated in this amendment. Where more than one PSAP is located within a county, the applicable ESInet designation is determined by the individual PSAP listed, not solely by county.

PSAPs Served by AT&T ESInet

PSAP Name	County
