North Central Texas Emergency Communications District (NCT 9-1-1) Next Generation 911 Phase 2 Valid Request Form

To Whom It May Concern:

North Central Texas Emergency Communications District (NCT 9-1-1), hereby respectfully notifies all Originating Service Providers (OSPs) operating within NCT 9-1-1's Next Generation 911 (NG9-1-1) service area of its valid request for compliance with the delivery of NG9-1-1 voice and text messages in IP format to designated delivery points pursuant to the Federal Communications Commission (FCC) NG9-1-1 Transition Order Phase 2 service delivery requirements (47 CFR § 9.31(b)).

To achieve the important objectives identified in the NG9-1-1 Report and Order, including expediting the NG9-1-1 transition and helping to ensure that the NCT 9-1-1 system functions effectively and reliably, the North Central Texas Emergency Communications District has worked diligently to achieve the necessary technology readiness to support this request. NCT 9-1-1 has implemented the necessary upgrades to our NG9-1-1 system to allow the receipt of NG9-1-1 Services in accordance with Phase 2.

Specifically, the North Central Texas Emergency Communications District hereby attests to and certifies the following:

1. Has installed and placed into operation all of the infrastructure needed to receive 911 traffic in an IP-based SIP format that complies with NG9-1-1 commonly accepted standards and transmit such traffic to the PSAP(s) connected to it. (47 CFR § 9.31(b)(1).)

2. Has an ESInet connected to a fully functioning Next Generation 911 Core Services network that can provide access to a Location Validation Function7 and interface with a Location Information Server or its functional equivalent provided by the OSP. (47 CFR § 9.31(b)(2).)

3. Has obtained commitments from any ESInet provider, Next Generation 911 Core Services provider, and/or call handling equipment provider needed to facilitate and complete connectivity testing within the compliance timeframe applicable to the OSP. (47 CFR § 9.31(b)(3).)

4. Is authorized to submit a valid request for the NG9-1-1 network to receive 911 traffic in an IP-based SIP format that complies with NG9-1-1 commonly accepted standards. (47 CFR § 9.31(b)(4).)

5. The NG9-1-1 Delivery Points for this Phase 2 request are the SAME as what was identified for Phase 1 IP-based SIP traffic:

    a. POI 1: 2323 Bryant St, Dallas TX 75201
    b. POI 2: 5959 Corporate Dr, Houston TX 77036

Confidential

The North Central Texas Emergency Communications District expects OSPs to directly or indirectly connect to these designated in-state POIs and deliver voice traffic utilizing SIP to comply with the Phase 2 requirements identified in the FCC NG9-1-1 Transition Order.

In addition to NCT9-1-1's Phase II request under FCC 24-78, NCT9-1-1 requests that each originating service provider identify its capabilities for delivering Real-Time Text (RTT) communications to 9-1-1.

For applicable services, NCT9-1-1 requests confirmation of:

1. Support for RTT-to-911 originating from compatible IP-based wireless devices and services.
2. The delivery method used for RTT communications, including native RTT and any required interworking.
3. Compliance with applicable FCC RTT-to-911 requirements.
4. Support for standards-based delivery through the designated NG9-1-1 network.
5. Availability of end-to-end RTT interoperability testing with NCT9-1-1 and participating PSAPs.

This request supplements the Phase II transition requirements and does not alter the separate obligations or readiness procedures established under the FCC's RTT rules.

With the support of Allerium, the North Central Texas Emergency Communications District Next Generation Core Services (NGCS) provider, we look forward to collaborating on this endeavor to enhance 911 service for the residents of North Central Texas.

Appendix A includes details required for this request.

Thank you in advance for your support.

Appendix A

1) Full Name of 9-1-1 Authority[1]

Provide the full name of the 9-1-1 Authority requesting NG9-1-1 Phase 1 service (under 47 CFR § 9.31(a)) and/or NG9-1-1 Phase 2 service (under 47 CFR § 9.31(b)).

North Central Texas Emergency Communications District (NCT 9-1-1)

2) Date of Submission

October 15, 2026

3) Name and Contact Information of Person Submitting Form

Name	Tommy Tran
Title	Chief Technology Officer
Agency	North Central Texas Emergency Communications District (NCT 9-1-1)
Phone Number	817-704-5648
Email Address	Ttran@NCT911.org

[1] A "9-1-1 Authority" is "[a] State, territorial, regional, Tribal, or local governmental entity that operates or has administrative authority over all or any aspect of a communications network for the receipt of 9-1-1 traffic at NG9-1-1 Delivery Points and for the transmission of such traffic from that point to PSAP." 47 CFR § 9.28.

Confidential

4) Point of Contact for Additional Information

The below-listed contact will provide additional information to OSPs[2] upon request, including information about the geographic location and facilities associated with NG9-1-1 Delivery Point(s)[10] designated pursuant to 47 CFR § 9.32. (See Questions 6 and 7.)

☐	Check this box if you are only updating the point of contact information below (and not using this form to submit a Valid Request). Please fill out the updated contact information below and leave Questions 5-9 blank.
☐	Check this box if the point of contact information below is the same as the contact information above. Leave the following contact fields blank.

Name	**Jennifer Navarrete**
Title	**Senior Manager, Programs**
Agency	**Comtech**
Phone Number	**(425) 890-1001**
Email Address	**Jennifer.Navarrete@comtech.com**

5) Request Type

Check one or both boxes.

☐	**Phase 1** – Request for OSPs to begin 9-1-1 traffic delivery in the Internet Protocol (IP)- based Session Initiated Protocol (SIP) format requested by the 9-1-1 Authority. (*See* 47 CFR § 9.29(a) for a description of Phase 1 requirements for OSPs.)
☒	**Phase 2** – Request for OSPs to begin 9-1-1 traffic delivery in the IP-based SIP format that complies with NG9-1-1 commonly accepted standards identified by the 9-1-1 Authority. (*See* 47 CFR § 9.29(b) for a description of Phase 2 requirements for OSPs.)

[2] "Originating service providers" are "[p]roviders that originate 9-1-1 traffic, specifically wireline providers; commercial mobile radio service (CMRS) providers, excluding mobile satellite service (MSS) operators to the same extent as set forth in § 9.10(a); covered text providers, as defined in § 9.10(q)(1); interconnected Voice over Internet Protocol (VoIP) providers, including all entities subject to subpart D of this part; and Internet-based TRS providers that are directly involved with routing 9-1-1 traffic, pursuant to subpart E of this part." 47 CFR § 9.28.

G9-1-1 Media Type Applicable to this Request

☒	NG9-1-1 Voice
☒	NG9-1-1 Text-to-9-1-1

6) Phase 2 Certifications and Information

If requesting Phase 2 service (47 CFR § 9.29(b)), please complete this question. Check each box below to confirm each statement and provide the information requested. All five components of this question must be completed before the Commission will consider the submission of this form to constitute a valid request for NG9-1-1 Phase 2 service for the NG9-1-1 registry. If requesting only Phase 1 service, please skip this question and proceed to Question 9.

☒	The requesting 9-1-1 Authority certifies that it has installed and placed into operation all of the infrastructure needed to receive 9-1-1 traffic in an IP-based SIP format that complies with NG9-1-1 commonly accepted standards and transmit such traffic to the PSAP(s) connected to it. (47 CFR § 9.31(b)(1).)
☒	The requesting 9-1-1 Authority certifies that its ESInet is connected to a fully functioning Next Generation 9-1-1 Core Services network that can provide access to a Location Validation Function[3] and interface with a Location Information Server[4] or its functional equivalent provided by the OSP. (47 CFR § 9.31(b)(2).)
☒	The requesting 9-1-1 Authority certifies that it has obtained commitments from any ESInet provider, Next Generation 9-1-1 Core Services provider, and/or call handling equipment provider needed to facilitate and complete connectivity testing within the compliance timeframe applicable to the OSP. (47 CFR § 9.31(b)(3).)
☒	The requesting 9-1-1 Authority certifies that it is authorized to submit a valid request for the NG9-1-1 network to receive 9-1-1 traffic in an IP-based SIP format that complies with NG9-1-1 commonly accepted standards. (47 CFR § 9.31(b)(4).)

[3] "Location Validation Function (LVF)" means "[a] functional element in NG9-1-1 Core Services (NGCS) consisting of a server where civic location information is validated against the authoritative Geographic Information System (GIS) database information. A civic address is considered valid if it can be located within the database uniquely, is suitable to provide an accurate route for an emergency call, and is adequate and specific enough to direct responders to the right location." 47 CFR § 9.28.

[4] "Location Information Server (LIS)" means "[a] functional element that provides locations of endpoints. A LIS can provide Location-by-Reference or Location-by-Value, and, if the latter, in geodetic or civic forms. A LIS can be queried by an endpoint for its own location, or by another entity for the location of an endpoint." 47 CFR § 9.28.

☒	Optional - For 9-1-1 Authorities that are requesting Phase 1 and Phase 2 service with this form, or that have previously submitted this form to request Phase 1 service and are now requesting Phase 2 service, please check this box if the NG9-1-1 Delivery Points for this Phase 2 request are the same as those identified for Phase 1. If you check this box, you need not complete the space below. Otherwise, please identify the Phase 2 Point of Contact below.

Name	Tommy Tran
Title	Chief Technology Officer

Phone Number	817-704-5648
Email Address	TTran@NCT911.org

7) Optional - PSAP(s) to which Request Applies

In the table below, please list each PSAP for which delivery is requested.

For each PSAP listed, please enter the FCC-assigned PSAP identification number (PSAP ID), PSAP name, and the NG9-1-1 phase requested. Please add extra rows and fields to the table as necessary.

If you do not know specific PSAP IDs or PSAP Names within your 9-1-1 Authority's jurisdiction, please visit the FCC's 9-1-1 Master PSAP Registry at https://www.fcc.gov/general/9-1-1-master-psap-registry or send an email inquiry to fccpsapregistryupdate@fcc.gov.
