Re: *Verizon Petition for Waiver of April 17, 2026*, PS Docket No. 21-479; *Commonwealth of Massachusetts State 911 Department Phase 1 Request of April 4, 2025*, PS Docket No. 25-143
Supplement to Verizon Petition for Waiver

Dear Ms. Dortch:

This letter provides an update of Verizon's wireline Phase 1 implementation efforts for the Commonwealth of Massachusetts and other 911 Authorities covered by the above-referenced Petition for Waiver (the "Petition").

In Massachusetts, VoIP customers were migrated to Verizon's Phase 1 solution on or about June 2, 2026, and all TDM customers were migrated across over 200 rate centers in the Commonwealth by July 27, 2026. Verizon's wireline network was capable of supporting wireline 911 SIP traffic in mid-January 2026 and, following the transition period described in the Petition to accommodate certain MLTS PS/ALI users,¹ Verizon began migrating TDM customers in Massachusetts on July 6, 2026. Massachusetts was the first 911 Authority for whom Verizon has migrated all TDM customers. For TDM customers, migration is implemented on a rate center-by-rate center basis and, as a result, is more time-consuming and labor-intensive.

Phase 1 deployment for the remaining jurisdictions subject to the waiver request was completed or substantially completed on or about June 2, 2026 for over 200 911 Authorities. This covers well over 900 PSAPs and approximately 99 percent of the wireline customers in those jurisdictions. Wireline Phase 1 is 100 percent complete in many of those jurisdictions, and Verizon is migrating the limited number of remaining customers in collaboration with those 911 Authorities and their NGCS vendors. Verizon has apprised (or will apprise) 911 Authorities as those remaining customers are migrated, and Verizon will periodically update the Commission as those migrations are completed.

¹ Petition at 5-9; *see also* Verizon Letter in PS Docket No. 21-479, at 1-2 (filed July 7, 2026); Verizon Letter in PS Docket No. 21-479, at 1-2 (filed May 28, 2026).

At the request of Bureau staff, Verizon has attached a list of the wireline Phase 1 requests submitted within the time period covered by the waiver request (i.e. through January 31, 2026) together with the known implementation status as of August 18, 2026. Information reflected in each column is described here:

- Column A: The requesting 911 Authority. (911 Authorities are listed in chronological order by the dates they submitted their request.)
- Column B: The date of the original request. Verizon originally requested waiver relief through June 30, 2026 for requests submitted on or before November 30, 2025, and through July 31, 2026 for requests submitted between December 1, 2025 and January 31, 2026.
- Column C: The compliance date as of the April 17, 2026 filing date for the Petition. This would show either (1) the original six-month date, or (2) a mutually agreed-to extension in effect as of the April 17 filing date.
- Column D: The date customers were migrated to Phase 1. Where Verizon's records indicate that a small percentage of customers remain for migration, Column F indicates that Phase 1 was substantially completed.
- Column E: Whether the request is still subject to the scope of the Petition. "Yes" indicates those 911 Authorities that have not mutually agreed to an extension that encompasses the Petition's applicable request for waiver relief. For purposes of this status report, 911 Authorities with mutually agreed-to dates of July 31 or later are excluded, and as noted above we will work cooperatively with those parties and their NGCS vendors to complete Phase 1 for the remaining records.
- Column F: Additional explanatory information.

Note that in addition to the 911 Authorities listed in the attachment, Phase 1 deployment is complete or substantially complete for over 200 additional 911 Authorities across 19 states.
